

SUMMARY

Senior Java Backend Engineer with 4+ years of experience developing enterprise applications using Java, Spring Boot, REST APIs, SQL, and Angular. Experienced in modular monolithic architectures, high-volume transaction processing, API integrations, database optimization, and production issue resolution. Currently strengthening expertise in microservices, Apache Kafka, AWS, Docker, Kubernetes, and system design.

EXPERIENCE

- SS&C Technologies** Hyderabad, India
Senior Software Engineer May 2025 – Present
 - DomaniRx:** Developing backend services for an enterprise Pharmacy Benefit Administration platform supporting high-volume claims adjudication and transaction processing.
 - REST APIs:** Designing and maintaining RESTful APIs for pharmacy claims workflows, including business validations, service-layer processing, and module integrations.
 - Modular Architecture:** Contributing to a large-scale modular monolithic architecture by developing reusable backend service modules shared across business workflows.
 - Production Engineering:** Troubleshooting production issues across APIs, business workflows, database operations, and transaction processing while improving application reliability and maintainability.
 - Agile Development:** Collaborating with cross-functional teams across requirements analysis, implementation, debugging, code reviews, testing, and production releases.
- LeadWinner Corp** Hyderabad, India
Associate Developer Jan 2023 – Apr 2025
 - Backend Development:** Developed enterprise applications using Java, Spring Boot, REST APIs, PostgreSQL, and Angular across multiple business modules.
 - Performance Optimization:** Optimized Spring Boot services and database operations, contributing to approximately 30% improvement in application performance and responsiveness.
 - API Development:** Designed and integrated REST APIs for communication between application modules and external systems.
 - Full-Stack Development:** Developed Angular-based user interfaces and integrated frontend workflows with Spring Boot backend services.

PROJECTS

- DomaniRx® – Pharmacy Benefit Administration Platform:** Enterprise pharmacy benefit administration platform supporting high-volume claims adjudication and transaction processing. Developed and maintained reusable backend service modules within a large-scale modular monolithic architecture. Designed and enhanced RESTful APIs for claims processing workflows, business validations, and inter-module integrations. Worked on production issues, database operations, debugging, and performance and reliability improvements across transaction-processing workflows.
- Square Up – Government Financial Management Platform:** Financial management platform developed for government departments to track and manage fund allocation and transactions. Developed Spring Boot REST APIs and PostgreSQL-based workflows for financial processing and transaction monitoring. Integrated the platform with PFMS and multiple banking systems to enable secure and reliable financial transactions. Built Angular dashboards for transaction monitoring, reporting, and data visualization.

TECHNICAL SKILLS

- Languages:** Java, SQL, JavaScript, TypeScript
- Backend:** Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, Redis
- Architecture & Messaging:** Modular Monolith, Microservices, System Design, API Design, Apache Kafka
- Databases:** PostgreSQL, Oracle, DB2
- Cloud & DevOps:** AWS, Docker, Kubernetes, Git, Maven
- Testing:** JUnit, Mockito
- Frontend:** Angular, HTML, CSS

EDUCATION

- Yeshwantrao Chavan College of Engineering** Nagpur, India
Bachelor of Engineering in Civil Engineering Jun 2018 – Jun 2022
